

**Help with  
bullying in the  
workplace**

## Help with bullying in the workplace

Bullying can happen anywhere. The best workplaces are those that take a preventative approach, raising awareness and supporting staff to take action.

### **The workshop will help staff:**

- Understand bullying and harassment
- Explore and recognise the impact of bullying on individuals, teams and work culture
- Learn practical based strategies for handling bullying situations
- Develop a positive culture where staff are empowered to take action

The workshop can be delivered from 1-2 hours depending on the needs of your workplace. Proceeds from the workshop help fund our vital work with children and families.

For over 35 years Kidscape has provided help to children and families going through a bullying situation and trained many adults in bullying awareness and response.

One child in every class is bullied on a daily or weekly basis. The practical tools we share in the workshop will also help staff who are parents and carers, or have children in their lives, better support them should they face a bullying situation.
